

I love and support XM Satellite Radio. I have been telling everyone about it! It has changed my driving habits for the better. I am a safer driver with my eyes on the road and my mood and spirit energized. Having a larger selection of good commercial free music and news choices has limited my constant changing of the old radio channels looking for some decent music to list to and not having to worry about what a DJ might say that is very offensive to me and my kids. The Nat'l Assoc of Broadcasters should not be able to dictate or govern the services I am paying for and what XM radio is able to provide to their listeners and subscribers. XM radio is an awesome alternative and a very good thing. It should not be limited or changed in any way

I WANT MY XM SATELLITE RADIO!
